

A User's Guide for HDF5

The following documents form a loosely organized user's guide to the HDF5 library.

HDF5 Files	A guide to the H5F interface.
Datasets	A guide to the H5D interface.
Datatypes	A guide to the H5T interface.
Dataspaces	A guide to the H5S interface.
Groups	A guide to the H5G interface.
References and Identifiers	A guide to the H5R and H5I interfaces.
Attributes	A guide to the H5A interface.
Property Lists	A guide to the H5P interface.
Error Handling	A guide to the H5E interface.
Filters	A guide to the H5Z interface.
Caching	A guide for meta and raw data caching.
Dataset Chunking	A guide to the issues and pitfalls of dataset chunking.
Mounting Files	A guide to mounting files containing external HDF5 datasets.
Performance	A guide to performance issues and analysis tools.
Debugging	A guide to debugging HDF5 API calls.
Environment Variables and Configuration Parameters	A list of HDF5 environment variables and configuration parameters.
DDL for HDF5	A DDL in BNF for HDF5.
